

DDI Implementation Professional Services [DNS/DHCP/IPAM]

Company Overview: Efficient IP [www.efficientip.com]

EfficientIP is a global provider of the most advanced and comprehensive DDI (DNS, DHCP, IP Address Management) products available. Efficient IP's SMART DDI approach offers enterprises and service providers a unique appliance based solution to intelligently simplify and automate design, deployment and management of the critical DDI infrastructure.

SOLIDServer™ centralizes all information from the IP plan and DNS and DHCP servers in one single interface and gives customers a consolidated overview to control the deployment of infrastructures and network services (VoIP, Datacenters, etc.).

Efficient IP has built strategic relationships with a number of software and hardware market leaders to develop complementary solutions and to enable new offerings from partners. This includes Microsoft, VMware, IBM, HP, SUN Microsystems, Dell, Red Hat, Novell, Cisco and ISC.

Efficient IP's client base includes hundreds of the most demanding companies in all business sectors to include Vodafone, EADS, Cap Gemini, HP, STMicroelectronics and T-Mobile with an established presence in the US, France, the UK, Germany & Spain.

Efficient IP offers a fast-paced, action-oriented environment. We promote a culture that embraces innovation, change, teamwork, and strong partnerships.

Location: France (HQ office – La Garenne-Colombes)

Travel: up to 40% nationally or Europe

Position Summary:

We are looking for a **DDI Implementation Professional Services Engineer** for our Global Professional Services Team. The main focus is to implement our solutions to include:

- Migrating from existing DDI solutions to our solutions.
- Scripting and data manipulation.
- Architect, design and implement/integrate our solutions.
- Help out on support during escalation and level 3/4.

Why this position is compelling:

- Serve as the DDI subject matter expert who represents Efficient IP and provides professional services
- Build relationships with customers, delivering outstanding service
- You contribute to the design and integration architecture of Internet information services appliances including DNS, DHCP, Security and Network Automation solutions.

Qualifications:

- Demonstrated relevant experience in the DDI space, preferably with more than one DDI solution. Must have experience taking the lead and running projects in a customer-facing capacity with major corporate accounts.
- Technical experience to include:
 - DNS, including DNSSEC, working and protocol.
 - DHCP, working and protocol.
 - TCP/IP, both IPv4 and IPv6.
 - ISC, NLNetLabs and Microsoft
 - Procedure-based working (ITIL experience helps).
 - Be fluid in networking, routing, switching and security.
 - UNIX O/S knowledge and Active Directory experience a plus.
 - Be fluid in infrastructures and accompanying management systems.
 - Be familiar with scripting to automate tasks (Perl, Bash, PHP, etc).
 - Experience with other DDI vendors is a plus
- Strong communication, interpersonal and presentation skills, with ability to articulate complex technology simply is required.
- Strong technical problem-solving ability and troubleshooting skills
- Self-motivated and able to handle multiple projects
- Bachelor's Degree preferred but not required
