

DNS Fundamentals

Course

TRAINING SUMMARY

Overview:

This course provides an overview of Domain Name System (DNS) principles and protocol.

Objectives:

By the end of the course, the students will be able to:

- Describe the principles of the DNS
- Describe how the DNS data are handled and organized
- Identify the various types of name servers
- Describe the key DNS operations
- · Describe the BIND engine

• Course type: eLearning

• Duration: 60 min

• **Audience:** System and network administrators

• Prerequisites: none

COURSE STRUCTURE: 4 chapters

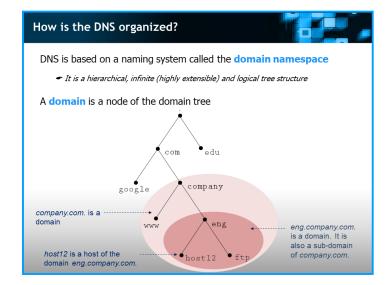

• Chapter 1: DNS Principles

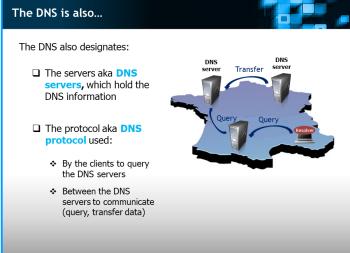

· Chapter 2: The Name Server

Chapter 3: DNS Operations

• Chapter 4: BIND Engine Description

COURSE ABSTRACT

REV: C-190219

As one of the world's fastest growing DDI vendors, EfficientIP helps organizations drive business efficiency through agile, secure and reliable network infrastructures. Our unified management framework for DNS-DHCP-IPAM (DDI) and network configurations ensures end-to-end visibility, consistency control and advanced automation. Additionally, our unique 360° DNS security solution protects data confidentiality and application access from anywhere at any time. Companies rely on us to help control the risks and reduce the complexity of challenges they face with modern key IT initiatives such as cloud applications, virtualization, and mobility. Institutions across a variety of industries and government sectors worldwide rely on our offerings to assure business continuity, reduce operating costs and increase the management efficiency of their network and security teams.
