

System & Network Developer

France - La Garenne Colombes (92)

[www.efficientip.com]

EfficientIP is a fast-growing network automation and security company, specializing in DDI (DNS, DHCP, IP Address Management). Our Smart DDI approach offers enterprises and service providers a unique appliance-based solution to intelligently simplify and automate design, deployment and management of their critical network infrastructure. Through patented technology, our 360° solution suite secures DNS services to safeguard sensitive data and ensure application access. Companies in all sectors rely on our offerings to face the challenges of key IT initiatives such as cloud, IoT, 5G, and mobility.

EfficientIP hardware and software solutions are developed to facilitate DDI management into a fully integrated solution. SOLIDserver™ centralizes all information from the IP plan and DNS and DHCP servers in one single interface, allowing our customers to manage their network services as a single entity, ensuring high availability, security and network consistency.

Job Description

The R&D team, product managers, developers, technical writers and QA team, is based in HQ France. A team composed of young technology enthusiasts who enjoy working in agility in a constantly evolving world.

At EfficientIP, Developers take part in all the phases of development of new features : from the design phase to the final release of the new software version. Therefore, in addition to the R&D team, you may also be required to discuss with the Marketing, Delivery, Training and Customer Solution Engineer teams in order to be as close as possible to the user experience and customer needs.

As a System & Network Developer, you will bring your experience and knowledge to the creation of innovative, robust and responsive features.

You will support the software business (DNS/DHCP services) as well as the environment on which it is installed (firewall, logs), both for the maintenance of the existing and for innovation.

In full collaboration with the other developers, your role will be to challenge and improve the existing architecture and code and propose refactoring in order to improve it.

Experience and Skills

We are looking for a passionate System & Network developer with a strong technical background.

Your curiosity and team spirit allow you to share your knowledge and acquire new ones with other team members.

You already have significant experience in software development and you have a solid knowledge of performance optimization and application robustness.

Experience or skills in the following technical area is required:

Stack skills :

- PHP (8) object oriented (or software programming language such as Java, C++, Python) without framework
- Shell scripting
- PostgreSQL
- Linux/BSD
- DNS/DHCP

Nice to have :

- Unit testing (ie: PHPUnit)
- Knowledge of the C language

What We Offer

We offer a great opportunity to grow with our company, in a rapidly advancing and strongly innovative environment.

At EfficientIP, we fully believe in congeniality in the workplace and in our relationships with our customers, partners and colleagues. We ensure a positive work environment that is encouraging, enthusiastic and motivating to our team. This approach breaks down barriers in order to stimulate our company's ambition of constant overachievement.

You will be part of a fun & ambitious team!
